

CHEESE
Cold Homes Energy Efficiency
Survey Experts

Would you like to be a voluntary Non-Executive Director of The CHEESE Project CIC?

It has never been more important to tackle the climate emergency and fuel poverty. Would you like to make a contribution by helping to scale up a leading-edge, community-led organisation that tackles both fuel poverty and climate disruption? Working with trusted local community organisations, we have developed over ten years the highly successful CHEESE Project CIC (Cold Homes Energy Efficiency Survey Experts), based in Bristol. We use a unique thermal survey system, enhanced by pressure reduction, to reveal energy loss from homes; using our own internal Heatview® survey protocol, Heatview® software and camera equipment, and a sophisticated bespoke booking and management system.

We have surveyed over 1200 homes to date and have won 4 awards including the industry-leading Big Pitch Award for Innovation at [Futurebuild](#) 2020. Last winter we gained over 50 five-star reviews on [Trustpilot](#).

We are looking for voluntary Non-Executive Directors to join The CHEESE Project board. Being a NED means you will play an important role in helping shape our organisation as it grows, combating climate disruption and fuel poverty in Bristol. The role requires a time commitment of about 1 day a month, including attendance at monthly evening Board meetings, annual strategy meetings, the AGM, and member events depending on schedules. We have a particular need for those with business/commercial experience, energy use in buildings and marketing expertise, but all backgrounds are welcome!

If you have time to commit to this award-winning social-enterprise company, please **email mike.andrews@cheeseproject.co.uk with your CV and cover letter.**
